Lubricants
Special Chemicals
Spare Parts

MINING

In the Mining industry, we know the needs that may arise in all difficult conditions. We offer solutions suitable for all your needs.

We have saved our customers approximately **\$1,000,000** annually in the global market.

WHAT WE OFFER?

Lubricants

We recommend the right products from global manufacturers, specific to machine park, working conditions and brand approvals.

Spare Parts

We manage the supply of spare parts needed by your equipment in the fastest and most suitable way.

Engineering

We visit your facilities with our expert engineers, check the working conditions and conduct studies on the efficiency of your equipment. We report these studies with parametric data.

DRILLING

It is very difficult to carry out operations in the most difficult conditions, in the most demanding processes. We share the difficulties with you, and present your needs in a complete and timely manner.

We have saved our customers approximately **\$1,000,000** annually in the global market.

WHAT WE OFFER?

Lubricants

We offer solutions based on the right equipment-right product philosophy. We bring you the exact answer of your needs.

Special Chemicals

Do not look for the special chemicals you need in onshore and offshore drilling activities far away. Contact us for timely and accurate product supply.

Spare Parts

Contact us for the best quality and correct solutions for the most accurate cutting tool, advancement equipment and other spare parts.

Engineering

We visit businesses with the drilling engineers in our team. We offer solutions suitable for your planned maintenance process, we regularly inspect and present it to you in parametric reports.

INDUSTRY

We offer all necessary purchasing solutions for the general manufacturing, metal and casting, aluminum, metalworking, aerospace, defense, food and beverage, paper and energy industries.

With more than 50 brands and more than 10,000 product types, equipment and spare parts, we eliminate your shortcomings up to %80.

WHAT WE OFFER?

Lubricants

Hydraulic oils, gear oils, greases, metalworking fluids, non-explosive fluids, water-miscible oils are just a part of our supply network. Contact us about any lubricant and grease needed in industrial enterprises.

Special Chemicals

Some processes may require special solutions. Take advantage of our alternative and competitive supply network related to these solutions.

Do not mind excuses like "Difficult to find!" and "Unit costs are expensive!"

Engineering

We visit your facilities with our expert engineers, check the working conditions and conduct studies on the efficiency of your equipment. We report these studies with parametric data.

ENERGY

We supply the most suitable lubricants, mechanical and electronic spare parts for your equipment working in Biogas, Landfill Gas, Biomass and Natural Gas cycle power plants.

We offer all the needs of the sector under one roof. We provide 24-hour service with our professional staff.

WHAT WE OFFER?

Lubricants

We offer A, B, C type fuel and gas engine oils approved by manufacturers such as Jenbacher, MWM, Cat, MTU, Guascor, Wartsila, and circulation oils approved by turbine manufacturers such as Siemens and ABB. In addition, we complete your needs with greases with high dropping points.

Spare Parts & Service

The national network of authorized suppliers can cause business blindness. Take advantage of our subsidiaries that provide care services. Get ready for competitive prices!

Engineering

We support your sustainable production activities with engineering activities such as trend analysis, boroscope, and thermal measurement.
